Statutory multiplications

By the time the children finish in Year 3, they should be able to recall all multiplication and division statements in the 2, 3, 4, 5, 8- and 10-times tables to achieve 'working at the expected standard in Maths. Throughout the year, we will practice during our daily Multiplication lessons. This will be through games, songs and actions. Please support your child by practising the weekly multiplication and division statements at home for a minimum of 10 minutes every day.

Year 4 Multiplication Check

At the end of Year 4 the Multiplication Tables Check is statutory for all primary schools. The purpose of the MTC is to determine whether pupils can recall their times tables fluently. It will help schools to identify pupils who have not yet mastered their times tables, so that additional support can be provided.

Our practise sessions in school and at home will enable the children gain fluency with their times tables and will prepare the children for when they start Year 4.

TT Rockstars

Please logon to TT Rockstars daily to practise the set multiplications. Each week the times tables will be set for the children with the statements that the children will need for that week.
